

Your Tailored Temperature Solution
for Efficient Modern Day Living...

APARTMENTS | CONDOS | ASSISTED LIVING | HOTELS | RESORTS

For over 40 years, Unilux VFC has been the manufacturer of choice for Vertical Fan Coil Units for use in hi-rise condominium, hotel, and senior home construction in Canada. All Unilux products are assembled in Canada using the finest components available in Canada and around the world.

Unilux VFC provides the quietest and most efficient fan coil unit available in the marketplace. Unilux VFC provides a full line of products to meet every need and allows building engineers freedom to determine the exact product configuration needed. The Unilux team works directly with the building engineer and mechanical contractor to provide the right solution, on time and builds the product to ensure easiest possible construction installation on the job site.

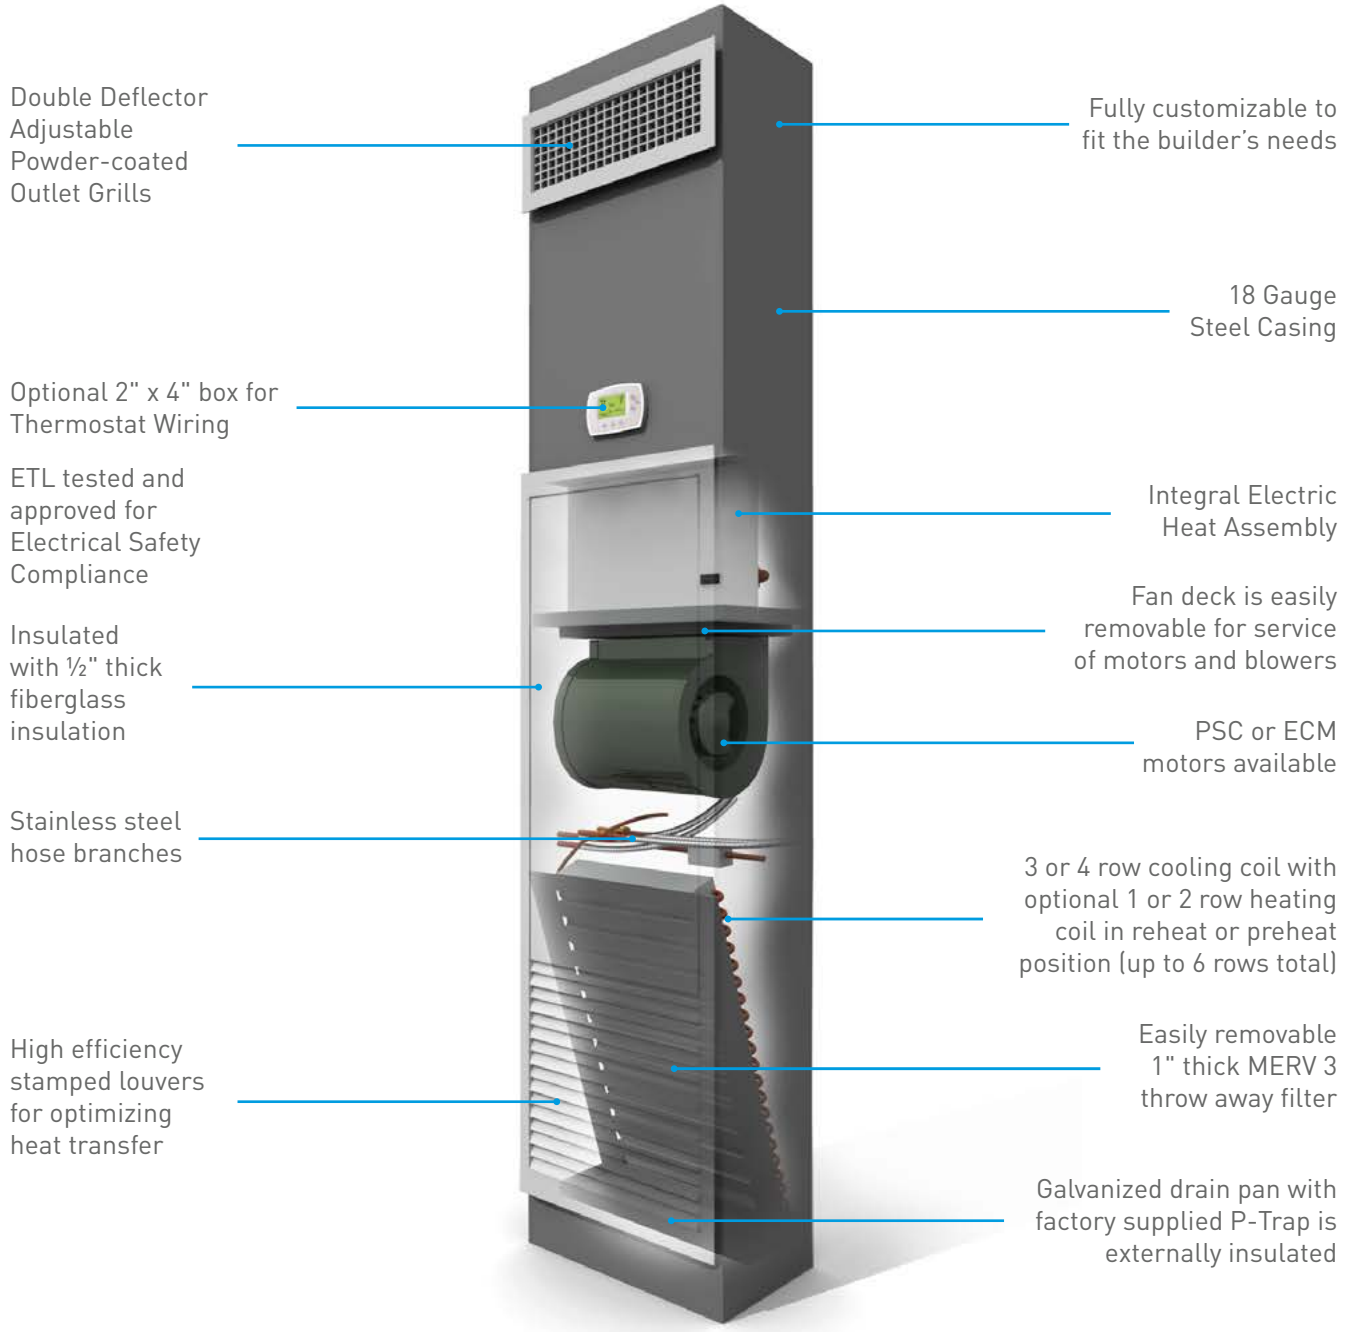

Benefits of Using Fan Coil Units

Fan coils have been in use for decades as a means of providing heating and cooling to individual zones. The major advantages of using fan coil units are that they allow for local control of individual zones, reduce the amount of cross-contamination between zones and allow for hydronic heating and cooling. Hydronic systems are far more efficient than all air systems because water piping takes up a fraction of the space of ductwork.

Vertical Stack fan coils provide a means of heating and cooling individual zones, in a cost effective, easy to install package. They feature all the advantages of traditional fan coils such as local control of individual zones and efficient hydronic cooling but their versatile arrangements allow the units to be positioned in a corner, along a perimeter wall or as part of a partition separating two areas to maximize the occupied space. Units also feature a large variety of factory installed options to reduce field labour.

Our ever improved, state of the art designs are demanded by today's best developers, engineers and owners. Contact us to learn why Unilux VFC is the preferred choice of professionals throughout North America for vertical fan coils.
